

Suite Glamping Adventures

RULES OF THE ROAD

A quick-reference companion to your Rental Agreement

- 1. Communication is key - when in doubt, call us.** If something doesn't look right, sound right, feel right, or work as expected, stop and contact Suite Glamping Adventures. Report damage, warning lights, tire issues, mechanical concerns, accidents, or other problems promptly. Don't force it, and don't keep driving if doing so could cause additional damage.
- 2. Approved drivers only.** Only approved, properly insured drivers may drive the RV.
- 3. No drinking and driving.** Drivers may not consume alcohol within 8 hours of driving and may never operate the RV while impaired.
- 4. No smoking or vaping.** Smoking or vaping is prohibited in, on, or around the RV. A \$500 Air Purification Charge applies for violations.
- 5. Know your clearance.** Know the RV's height and width as placarded on the vehicle. Watch carefully for trees and overhanging branches, bridges, gas-station canopies, signs, structures, and other obstacles. No drive-throughs. When clearance is limited or uncertain, use a spotter whenever possible. If you're not sure, stop and check before proceeding.
- 6. 62 MPH maximum.** Our motorized RVs are intended to be driven at 62 MPH or below. Excessive speed may result in damage for which the renter may be responsible.
- 7. Slides in before you move.** Check for adequate clearance before extending a slide. All slides must be fully retracted before moving the RV. If a slide doesn't operate normally, don't force it - call us.
- 8. Awning: 10 MPH maximum wind.** Never use the awning when winds exceed 10 MPH. Retract it during storms and any time the RV is unattended.
- 9. Stow the mirrors at camp.** Exterior side/rear-view mirrors must be folded or stowed whenever the RV is parked at a campground or campsite. Return them to the proper driving position before moving the RV.
- 10. Stay off the roof.** Do not climb on the RV's ladder or roof unless specifically authorized by Suite Glamping Adventures.
- 11. No cooking while driving.** Cooking or using cooking appliances while the RV is moving is prohibited.
- 12. Read the placards.** Follow all posted instructions for fuel, generator, slides, appliances, hookups, and other RV systems. Never guess at fuel type or force an RV component that isn't operating normally.
- 13. Take care of the tires.** Tires are inspected before departure and confirmed to be in serviceable condition. Renter is responsible for renter-responsible tire damage during the trip and related damage caused by a tire incident. Replacement tires must be new and the same size, type, and appropriate load rating, unless we approve otherwise. Contact us before arranging a repair or replacement whenever reasonably possible.
- 14. Choose RV-appropriate roads and sites.** No off-road travel or roads unsuitable for normal RV use. Make sure campsites can accommodate the RV's size, weight, slides, and utility requirements. Travel into Mexico is prohibited; travel within the U.S. and Canada is permitted subject to applicable coverage.
- 15. Use hookups correctly.** Use appropriate RV electrical, water, sewer, and leveling equipment. Don't improvise connections or repeatedly reset breakers, force slides, or continue using a system that isn't working correctly. Call us first.

16. Don't abandon a disabled RV. If the RV becomes disabled, get to a safe location and contact us/roadside assistance. Unless there is a safety emergency, coordinate with Suite Glamping Adventures before leaving the RV and reasonably cooperate with the recovery process. Additional recovery costs caused by an unauthorized abandonment may be the renter's responsibility.

17. Protect the RV if something happens. Take reasonable steps to prevent additional damage after an accident, breakdown, leak, tire issue, or other problem. Take photos, save receipts/documentation, and contact us promptly.

18. Tolls, tickets & citations are yours. Renter is responsible for tolls, parking charges, tickets, and citations incurred during the rental. Charges subsequently billed to the RV may be charged to the renter.

19. Return the tanks empty - or let us do the dirty work. Black and gray tanks should be returned empty unless We Dump 4 U has been added. If you don't want to deal with it, contact us before return.

20. Insurance/Protection coverage is required - but it doesn't cover everything. Renter remains responsible for applicable deductibles and renter-responsible damage or expenses not covered by insurance or the selected Protection Package. The security deposit is not the maximum amount of renter responsibility.

**RVing is 90% glamping and 10% camping. Things occasionally happen.
Communication is key. If you're unsure about anything, call us - we'd much rather help you solve a
small problem than have it become a big one.**
